## Ministry of Industry, Energy and Tourism

# Economic impact of ICT

- Impact on job creation
- Impact on productivity
- Consumer welfare

**The Digital Agenda for Spain defines the Information and Communications Technologies & Public Administration strategies for 2013-2015.**

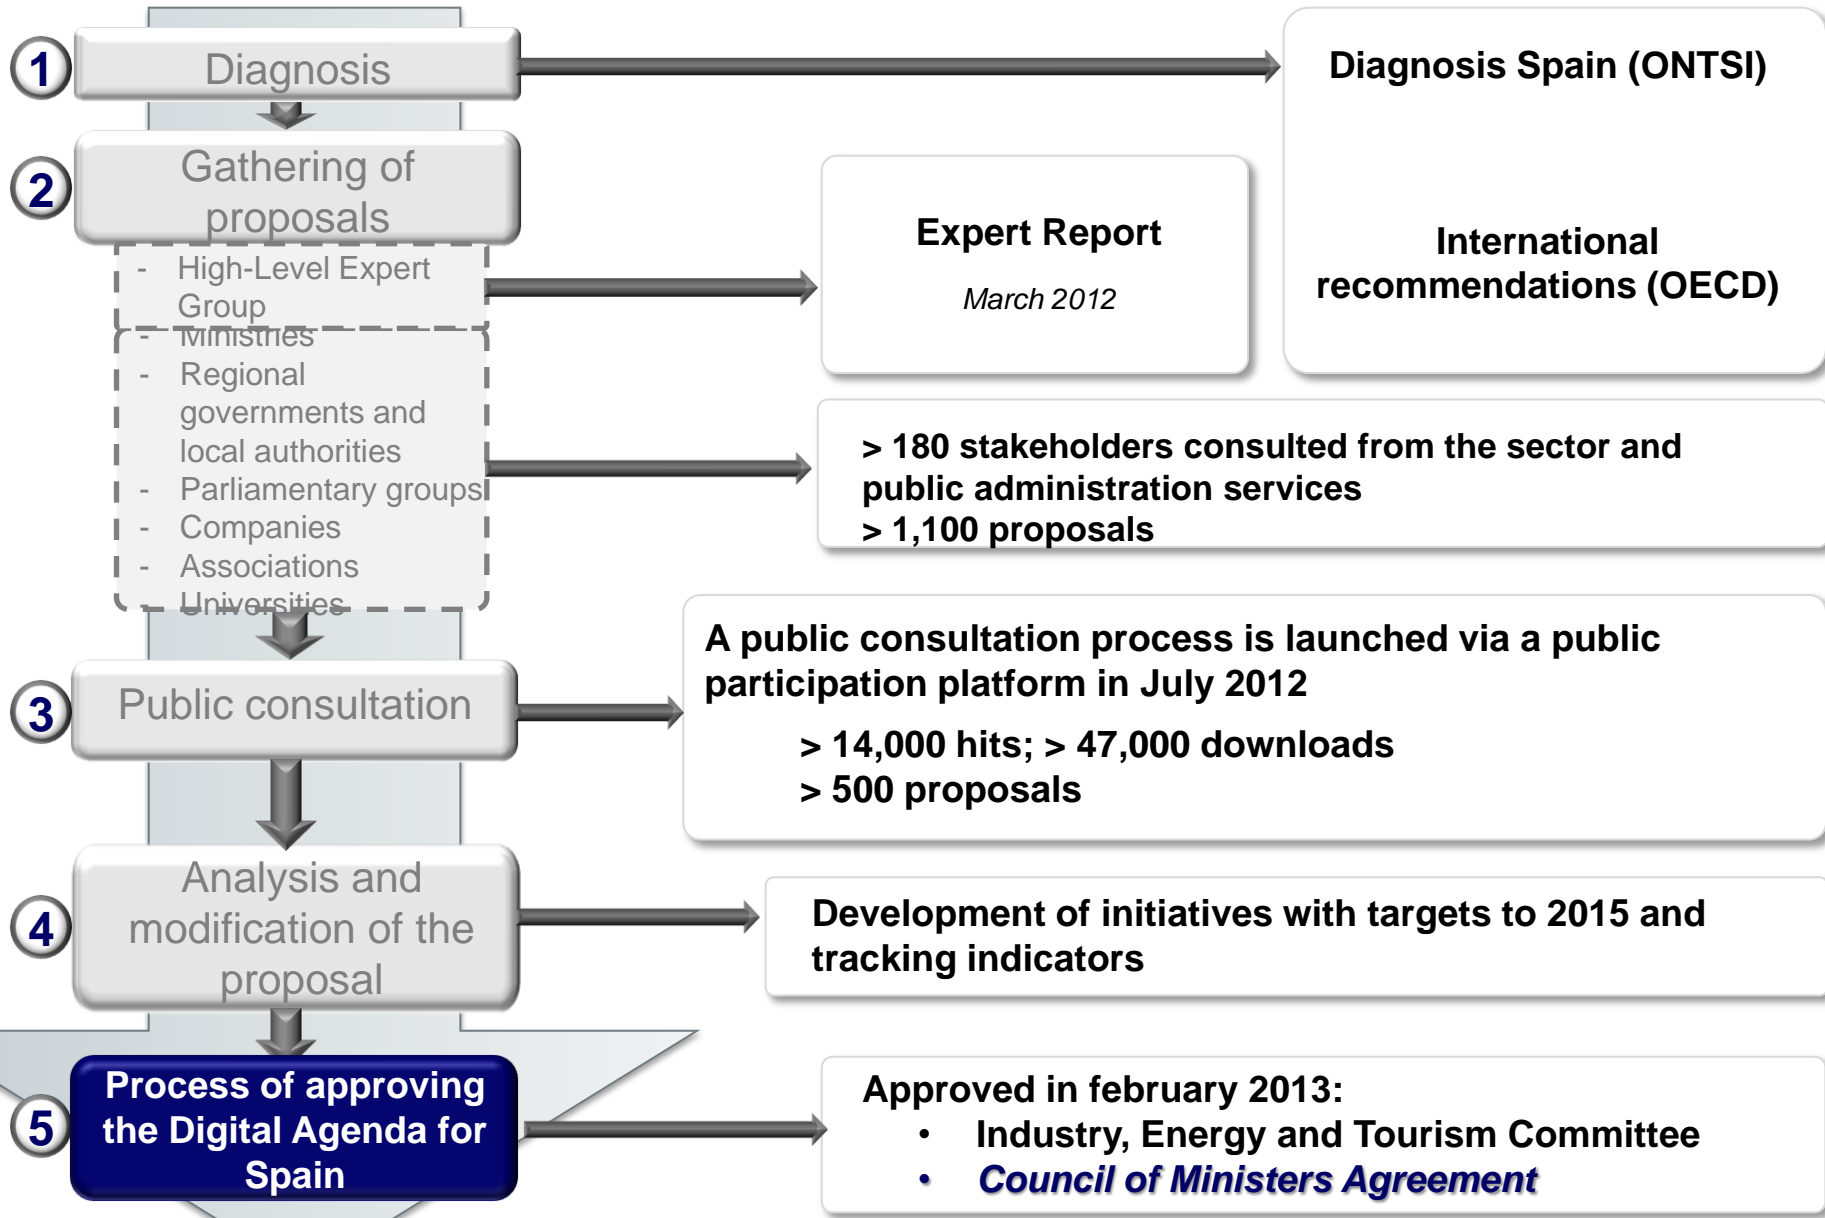

# Key data on the ICT sector in Spain in 2011

**Source:**

2011 Report on the Telecommunications, Information Technology and Content Sector in Spain  
Spanish National Telecommunications and Information Society Watchdog (Spanish acronym: ONTSI)

# Open and transparent drafting process

# Digital Agenda for Spain: 6 objectives

## Objective 1

Foster the rollout of networks and services to guarantee digital connectivity

## Objective 2

Develop digital economy for growth, competitiveness and internationalisation of Spanish companies

## Objective 3

Improve eGovernment and adopt digital solutions for an efficient provision of public services

## Objective 4

Reinforce trust in digital environment

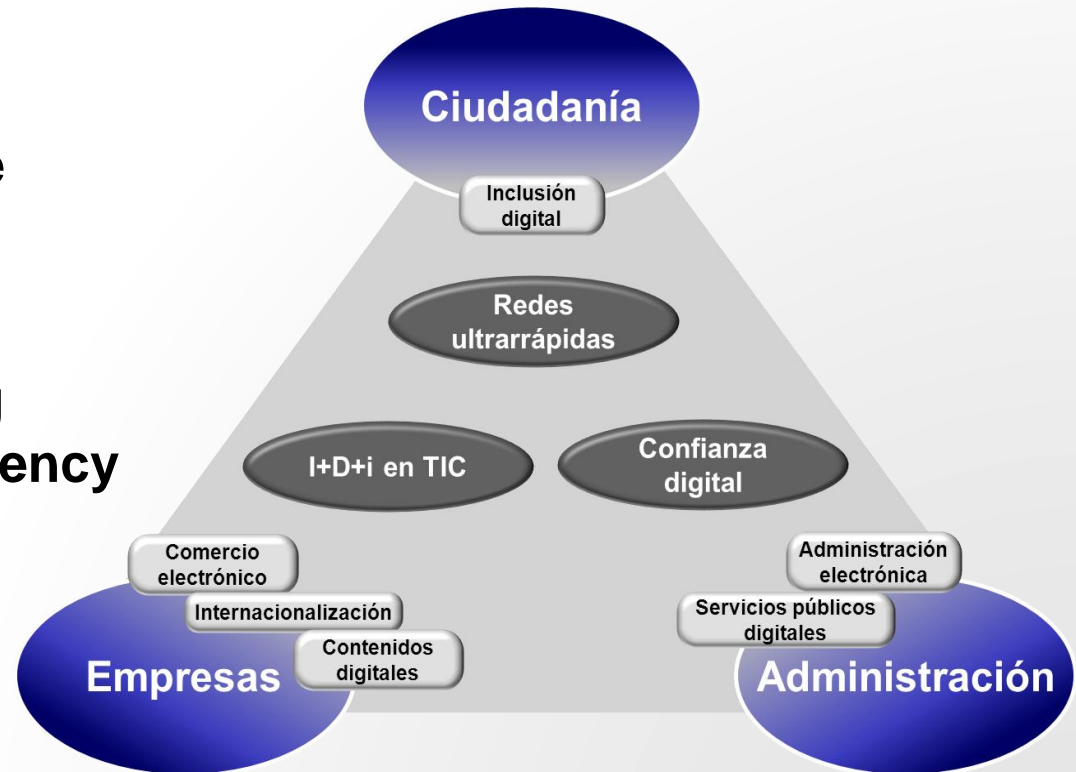

## Objective 5

Boost the Research, Development and innovation system in ICT

## Objective 6

Promote digital inclusion and enhance digital literacy and skills

- 3 **cross-cutting plans** that enhance the **supply** (ultra-fast networks) and the **demand of ICT** (confidence in the digital arena and R&D+i )
- 6 plans aimed at **increasing competitiveness and efficiency through the use of ICT**:
  - Citizens
  - Companies
  - Administration services
